BUILDING ASSOCIATIONS

And Free Silver—How Members would Suffer by the Proposed Policy. The Philadelphia Press has the fol-

lowing, which is of interest to every person who holds membership in a building association: To the editor of the Press:

"STR:—Will you kindly state just in what manner members of building a sectations would be affected by 'free all-ver!' In what way and why should the value of shares be depreciated?

"Philadelphia, July 24,1896."

A building and how should the control of the shares be depreciated?

"Philadelphia, July 24,1896."

"Philadelphia, July 24,1896."

A building and loan association callects weekly or monthly payments from its members. The money thus contributed is leaned on bond and mortgage, usually to members of the association who are trying to purchase a home. These loans are payable in a short term of years, as the association divides its shares "series" by "series."

The practical result of this is that every dollar now in local building and loan associations has been paid within a few years, elght to twelve at the farthest. The engire assets, shout \$890,000,000, owned by about 2,000,000 share-holders, represented in these associations has been paid within a few years, elght to twelve at the farthest. The engire assets, shout \$890,000,000, owned by about 2,000,000 share-holders, represented in these associations has been saved, paid and loaned since the existing 'gold standard' was established by resumption in 1872. All this sum was paid in dollars on a parity with gold, enjoying the purchashing power of gold and saved on a gold basis. If the Chicago platform is successful at the poils and a President pledged to carry it out is elected next November, the country will go on a silver basis. All "dollars" now worth \$1 in gold will be worth only \$1 in silver. This will be true of the consideration specified in every building association loan, Such a loan can now only be satisfied by dollars on a parity with soller.

The nominal number of dellars will be unchanged by the burchaspers her these trues will be unchanged by the purchaspers.

be satisfied by dollars on a parity with silver.

The nominal number of dollars will be unchanged, but their intrinsic or ex-changeable value, and hence their pur-chasting value, will have fallen one-half. The debtor who has borrowed the money from the building association will pay the debt more casily, but when it has been paid and divided among the share-holders each of them will find that it will buy only half as much in commodi-ties. Frices of all goods will be doubled. The number of "dollars" in the repud loan will remain unchanged. While their The number of "dollars" in the repaid loan will remain unchanged. While their

The number of "dollars" in the republican will remain unchanged. While their number will remain the same, yet the amount of things they will buy will be reduced one-half.

The value of shares will be depreciated in this way one-half. This is clearly understood by the able and experienced men who managed the annual convention of the local building and loan association league, which has just met in this city. The members of this convention voted unanimously for three resolutions on this subject, as follows: "First—That it is the sense of this meeting that the interests of all share-holders of building and loan associations of the United States demand that the present standard of values, upon which our monetary system has been based since the resumption of specie payments in 1879, shall remain unchanged and inviolate.

"Second—That we believe that the in-

ed and inviolate.
"Second—That we believe that the interests of every class in the community
and especially those of the great wage
earning class, imperatively demanthat every dollar in circulation, whether coin or paper, shall be equal in pur-chasing power, and, therefore, equal in chasing power, and, therefore, equal in value, to every other "Third — That patriotism demands that the 'dollar' bearing the mint-mark of the United States shall be the equal of the dollar of the most advanced nations, and entitled to full faith and credit all over the world; and to that end it must be maintained free from all suspicion of debasement or repudiation."

The men who voted this way have no "polities" in their utterance and are not

The men who voted this way have no "politicians. They represent 2,000,000 shareholders who have loaned \$800,000,-000, and they want the money they have loaned back in as good dollars as they have paid. The Chicago convention, its candidate and its supporters look on these shareholders—who want the honest dollars they paid repaid in dollars as honest—as "capitalists" who are trying to "bress a crown of thorns on the brow

to "press a crown of thorns on the brow of labor." WHO ARE CREDITORS 1

Some Plain Facts for Workingmen to

Think About.
Cincinnati Times-Star: After lend-Cincinnati Times-Star: After lending all the money they could control and receiving therefor contracts to pay back toe indebtedness in gold, such silver mine owners as Jones, Stewart, Teller, et al., have set about convincing a large number of debtors throughout the country that it is their duty to bring about such a condition of affairs in the country as will permit them to pay off their creditors in a depreciated dollar. Having secured themselves by their gold contracts it has become a matter of indifference to Jones et al. as to what becomes of the other creditors of the country. So long as they can profit by a change it is of no consequence to them whether the rest of the creditors of the country are ruined or not.

Who are these creditors whose ruin the Tellers, Jones, Stewarts, Aligelds, Bryans and others seek? Every state in the union is full of them. There isn't a small hamlet in which will not be found numerous people who directly or indirectly belong to the creditor class. The New York Sun thus classifies them:

All persons who work for wages, salarry or by the plees.

who work for wages, sala-

All persons who work to hope, and ry or by the piece.

All members of building and loan associations.

All depositors in savings, national, state or private banks.

All holders of life, fire and accident in-

surance policies,
All members of benevolent and fra-

All members of benevolent and fra-ternal insurance orders.
All holders of industrial insurance.
All widows, orphans or wards depend-ent wholly or partially upon the in-come from investments.
All educational and charitable insti-tutions dependent wholly or partially upon the income of their endowments.
Does the honest voter of the country hope to benefit himself by covering all of these classes with ruin? Does the stalwart laboring man think to play the role of Samson pulling down the pillars of the temple of honor and think that his own head will continue in safety?

The Shorter Silver Catechiam.

The Shorter Silver Catechiam.

New York World: Q.— Suppose we should drop to a silver basis, and all debts be paid in 50 cent silver dollars. Who would benefit? A.—Only the banks and bankers. No one else could. Q.—Why not? Why could not Smith, who now owes Jones \$1,000 in gold, then pay him in silver dollars? A.—Hecause the banks and savings institutions would pay all depositors in 50-cent dollars, and when Smith drew out his \$1,000 it would be in 50-cent dollars. The bank would make \$500. Smith would not make a cent and Jones would lose what the bank made.
Q.—Suppose Smith had the money in Q.—Suppose Smith had the money in.

a cent and Jones would lose what the bank made.

Q.—Suppose Smith had the money in his nocket? Would not those who have hourds in stockings and stovenines benefit? A.—Not one cent. They have all carned it on a gold basis. It is now the same as gold to them. Then it would be only silver. What Smith would then pay would be the same as gold to him—earned on a gold basis. It is hourd would be reduced in value one-half, Q.—Why? A.—Because practically all money now in use in the hands of the people is silver or paper redeemable in silver.

Q.—How much are the banking depos-

-How much are the banking depos-

Q.—How much are the banking deposits of the United States? A.—In round figures, \$5,000,000,000, every dollar representing property valued in gold and legally payable in silver.
Q.—What would be the effect of the United States going on a silver basis?
A.—To make the banks and bankers a present of \$5,000,000,000 in gold or \$10,000,000 in silver, on which they have issued credits of \$5,000,000,000. If they have have these credits in silver they make pay these credits in silver they make \$5,000,000,000; if in gold only the regular commission.

THE King of Pills is Beecham's-

\$\$00 IN GOLD DROWNS A MAN.

At the burning of a steamboat on the Hudson river many years ago, many of

At the burning of a steamboat on the Hudson river many years ago, many of the passengers were drowned. Among the bodies brought up from the bottom of the river by grappling was that of a man known to have been an excellent swinner. Around his waist was a belt containing nearly \$800 in gold. That told the story.

"In old and chronic cases of Indigestion (dyspensia or gastritis—it is all the same) the sufferer develops a great variety of symptoms and often diespoisoned by the products of his own torpid and inflamed stomach. His food, instead of being digested, and so furnishing strength and physical substance, ferments and putrefles within him. The chief process of life is arrested at a vital point. The more he eats the worse off he is. And yet unless fican be fed he must also perish. People do so die, daily, by thousands, but we doctors seldom have the moral courage to give the cause its true name lest we should be laughed, at for our inability to cure so 'simple' at thing as indigestion. Simple? Why, it is the caustone of all complaints—and the mother of most of them."—So writes a famous English physician.

Some of the symptoms alluded to are these: Loss of appetite; distress after eating; heartburn and palpitation; giddiness; foul taste in the mouth; the rising of nauseous acids and gasses into the throat; furred tongue; spast before the eyes; unaccountable wearlness and fatigue; sluggish circulation; weakness and nervous prostration; constipation or diarrhoea; discolered skin, etc.

The sufferer's friends often advise him to cheer up; to throw off his lethargy and eat freely. Bad advice. He knows better, "No," he answers, "I cannot; my food does me no read." He knows better, "No," he answers, "I cannot; my food does me no read." He knows better, "No," he answers, "I

argy and cat freely. Bad advice. He knows better, "No," he answers, "I cannot; my food does me no good," He ls right. Food now is gold in the spent

is right. Food now is gold in the spent swimmer's belt.

Take light nourishment, followed immediately by a dose of the Shaker Digestive Cordial—a new and radical remedy discovered and prepared by the Shakers of Mt. Lebanon, N. Y.—the essence of medicinal herbs and plants cultivated by them alone. Then continue with it. Releves at once and soon cures. Pleasant to the palate and adapted to all constitutions.
